Landscape Prairie is a small, delightful theme that will use the image of the prairies and the stormy sky to enhance your desktop. If you want to go for a walk in the prairie, or just admire a beautiful sky, then try this theme. Follow us on This theme was built as a result of my long experience in the field of software development. I have realized a need for a small, beautifully designed theme for those who are interested in small-screen devices. It is designed to fit perfectly into small devices such as tablets and mobile phones. The theme's design is strongly based on the features of small-screen devices. I tried to make it responsive and build a nice interface on any device. There is no need to install extra programs or change the device's theme to make the theme work. You can customize this theme in all available ways. For example, you can customize the colors, font, and even the icons. In addition, Landscape Prairie has a wide range of options. You can hide or display the panels, reorder the menu items, and show or hide the panel's widgets. We highly recommend using the panel widgets for your own convenience. You can switch between the basic version and the complete version by pressing the "Change to the full version" button. If you are experiencing difficulties with the installation of the theme, then make sure that you have downloaded all the dependencies and libraries. Here is what you will get in the package: Themes: Landscape Prairie basic and full version. Images: The images are already included in the package. You do not need to download them again. Libraries: The libraries that are required for the use of Landscape Prairie are included in the package. Support: Landscape Prairie has a support page on my website. If you experience any problems, then make sure to visit this page to find a solution. Unsupported devices: Landscape Prairie has a "Support" page on my website. The page contains instructions on how to install the theme on unsupported devices.
