OutlookFreeware Utility Manager provides the basis on which all the other Microsoft Outlook add-ins provided by its developer rely on. Its role is to provide a centralized management tool for all the tools you install on the computer, allowing the easy launching of an add-in. The installation package includes an Outlook add-in and a standalone application that you can use independently of Outlook. In case you consider that the add-in is not necessary, you can disable it from within the mail client and use the GUI interface for managing installed OutlookFreeware.com add-ins. The main GUI of OutlookFreeware Utility Manager is very simple, comprising a few options for organizing the detected tools. The desired add-in can be selected with the help of the so-called 'Utility Manager', which is capable of detecting and displaying the add-ins that are present in your system. To do so, it analyzes the content of a special folder in the AppData directory. In case the list contains a large number of items, the searching and the filtering functions can be of great use. Additionally, you can delete individual entries and create a favorites folder to store the most frequently used utilities there, for faster access. OutlookFreeware.com provides users with various tools for improving the user experience in Outlook. The collection of add-ins are dedicated to exporting and importing items, generating statistics, managing attachments and so on. But none of these useful tools cannot run in the absence of OutlookFreeware Utility Manager, which includes the runtime components that they require in order to properly launch in Outlook. OutlookFreeware Utility Manager (former OutlookFreeware Runtime) Requirements: Outlook: - It is required to install the included Add-in in Outlook and have the add-in checked for. - To remove an installed add-in: Remove the entry from the list, then go to Options, then Add-Ins and remove the corresponding entry. It is set in some future where humans have formed a loose alliance with a number of alien species. An alien army of some sort arrive on earth, but humans think they are trying to steal some kind of food. A sentry has been placed near the entrance of the building where the aliens have set up their headquarters. The sentry senses something wrong and gets into an argument with its human handler. The handler steps in and knocks the alien over and the sentry stops barking. A: This is a short story by Brian Aldiss, which I read about 4 years ago. It's called "The Sentry Dogs".
