...Jun 12, 2010; In the early 90s, when the first Zelda game was released on Nintendo, I was a kid and my friend was another kid. We both played The Legend of Zelda when it came out, and each of us thought that the. Stable rubber-like nanofibers based on photocross-linking in an aqueous solution. Degree of cross-linking during electrospinning can be effectively controlled by blue light-induced photografting of acrylic groups to rubber-like poly(styrene-butadiene-acrylic acid) (PS-PAA) nanofibers. Such nanofibers could be as stable as their native, uncross-linked counterparts, while their

morphology as well as mechanical, functional, and optical properties could be tailored. Spot f988f36e3a
