Torrent History. Cars Workbook V3. Answer.53 -- DOWNLOAD (Mirror #1) 7286bcadf1.Q: Fetch data between certain time in oracle I have a table of payments which has columns ID, CUS_NO, PERIOD and AMOUNT. Here PERIOD is of type varchar2 and represents the start and end of the period. How can i get all the records between certain dates in oracle 12c pls help. A: If I understand correctly you want to retrieve all payments between a specific period starting and ending date. This should work: SELECT * FROM payments WHERE TO_DATE(PERIOD, 'YYYY-MM-DD HH24:MI') BETWEEN TO_DATE('2018-06-01 00:00:00', 'YYYY-MM-DD HH24:MI') AND TO_DATE('2018-06-30 23:59:59', 'YYYY-MM-DD HH24:MI'); Gene therapy: reduced number and diminished fertility with a bovine granulosa cell line expressing beta-galactosidase. Bovine oocytes, granulosa cells, and cumulus cells, isolated from sexually immature Holstein heifers, were electroporated with plasmids expressing beta-galactosidase (beta-gal). The cumulus cell-granulosa cell complexes were then cultured in four-well dishes (2 x 10(6) cells/well) and the beta-galactosidase content was analyzed. Electroporation resulted in gene transfer to a portion of the granulosa cell population. The rate of gene transfer was further increased when electroporation was carried out in the presence of the detergent Genapol-X-80. Granulosa cells and cumulus cells electroporated under these conditions expressed beta-gal and secreted the enzyme into the culture medium. Granulosa cells that had electroporated were then used to construct a granulosa cell line that secreted beta-gal. The cell line was cultured for approximately 40 passages before the beta-gal was neutralized. Analysis of these cells showed that most of the cells expressed beta-gal. The magnitude of the reduction in beta-gal activity varied among the cells. However, the number of cells expressing the 79a2804d6b
