- Fully Responsive - works great on all devices and screen sizes - Instant access to English and Spanish dictionaries - Search within files and folders for keywords and phrases - Advanced time-saving functionality - Load times are lightning fast, so you don't have to wait long to start reading The ability to record your voice and have it read out loud to the audience is so helpful. I found this app to be great for this purpose, but it lacks the ability to re-record. I would give it 4 stars if it could be re-recorded. One major issue is that I cannot find any way to change or remove the different languages that it has. If I just wanted to use it for English. I would think that I would be able to just add it as an option, but it just shows all of them and there is no way to remove or add any of them. I want it to give me all of the languages and I want to be able to turn them off. I don't need all of the languages. I just want English. That's all I want it to do. Also, if I want it to read to me in a different language, I have to manually remove the English one and then add the new language. It does not change it automatically. I would rate this app 3 stars because it does what it needs to do. P.S. I'm not trying to rate it down. I would rate it down if it had a way to remove all of the languages from the app. If it only offered English, I would rate it 4 stars. But it doesn't. It offers all of the languages and I can't remove them. I have used another app, one that was recommended to me by a friend. It was great for my purpose of listening to emails and texts out loud. It was easy to use and the quality of the reading was very good. That is the only thing that worked. It stopped working altogether after updating to iOS 12. I've tried it on multiple devices, a few operating systems and it will not read anything anymore. This is very disappointing. It would be better to disable all voices and use the built-in one. Language Reader is one of those apps that's so simple and easy to use, but when I have a word or phrase to translate, it doesn't display the corresponding words. It always displays the last word, even if I have a longer sentence. It also 2edc1e01e8

In fact, your creative writing abilities has inspired me to get my very own website nowSocial Icons Thursday, July 14, 2011 The release of a special issue dedicated to the German physicist Max Planck has created a mini-storm on the internet: authors as well as editorial staff were outed as authors of a cover letter. On July 8th, the German magazine Zeit online posted the cover letter and explained that it was originally written by Dr. Oliver Hahn and that all pages were approved before publication. The article was placed on a specialized web server, so only visitors to that server would be able to read it. The controversy has led to a lively debate on the internet, with many questioning the authenticity of the letter. Some people have questioned why Hahn, who is no longer alive, would have authored a letter that discusses the state of the science on a controversial matter after his death. Hahn was closely associated with the development of the quantization theory of the electromagnetic field, which led to the invention of the quantum mechanical theory of elementary particles. A petition was signed by over 30,000 people who support the theory of relativity, in response to the issue. Last year, another scientist was found to have been the author of a cover letter in a scientific journal. Robert Wilson,
