

Installation & Usage: After installing the program please read instructions. After install the program to start the program, you can enter the file directory in the Menu. There you can find the program in the directory: OpenOffice-Calc.exe
Requirements: You must have an Microsoft Windows PC with basic access of computer. You need a USB port to transfer data to your PC.
Steps to Use SysInfoTools OpenOffice Calc Recovery: Step 1. Launch SysInfoTools OpenOffice Calc Repair:
1. Click on "Open" button and select "SystemInformationTools-OpenOfficeCalc-OCalcRepair.exe" file
2. Enter file directory:
>Click on "Browse" button. Navigate to the directory where your corrupted ODS files are located and select one file by clicking on browse button. Once selected one file, click on Open button.
3. Click on Start button. Wait for the repair process to finish. A message will pop up saying the repair was successful and an ODS file is being created for you to save. Click on OK button to close the message.
4. Click on "Create" button to save the created file. After saving the file click on "Open" button to open the file in your MS Word, Excel etc.
Notes: Please follow the steps mentioned above to perform the whole process. After finishing the above process please close the program and do not open the program for the next time, to avoid the program to rerun the same process. This software is the DEMO version. If you have any issue, please send email with attachments of the file and error message. Please pay attention to the file name given in the output window. After repair, the file name will change and the file will be named as "OpenOffice-Calc.extend- where is the name of the ODS file before repairing
Example: Before repair, ODS file is named as ODS_Salary.ods. After repair, the file will be named as ODS_Salary.extend-Salary.ods. After you finish repairing the file, please save the file with the same name. IMPORT

KEYMACRO is open source software and offers a macro keyboard for word and excel documents. It is used to automate tedious tasks, allowing you to simply click and type in the keyboard to perform tasks. It also allows you to create custom keyboard shortcuts that you can use to perform repetitive tasks and be more productive. The standard keyboard includes a built-in calculator, a spreadsheet, a unit converter and a dictionary. KEYMACRO Keyboard is one of the most powerful utility which allows you to control Microsoft Word, Excel and PowerPoint documents. This software has a built-in calculator, a built-in spreadsheet, a built-in unit converter and a dictionary with translation.
