I spent some time looking at yet another canvas image editor, and after watching my son, Harper, sketch, paint and doodle with the iPad Pro's Apple Pencil, I'm no longer a fan of using a laptop in my studio. iPad Pro is my canvas, around which I'm sketching, painting and doodling. As I mentioned in my article on the Apple Pencil, I love using the iPad to capture moments as they happen. And even though I'm an expert Photoshop user, I'm learning to use apps like Stroke and Sketch in a whole new way. Plus, with a tool like the Apple Pencil, I can move to the iPad Pro right away and still work, so I don't miss a beat. It's official: The iPad Pro and Apple Pencil are now the perfect combination for artists and designers who want to sketch on the go. I've been using Apple Pencil Mode for a few weeks now, and it's great. Plus, with the latest iPad Pro update, the Apple Pencil can now also write drawing strokes. But it takes a few minutes before the Apple Pencil draws, so it's great for getting in and out of the sketch stage quickly. Back in the day, I spent hours creating custom file types. Now in this release of Photoshop, Adobe has created custom file types to save Time: .p2r, .p2d, .p2t, .p2b, .p2dm and .p2sd. These are based on a new file format that can adapt images saved in other file formats - like PDF, ePUB, PICT and more. Time savings is great for people who switch between viewing (read) and editing their photos (write) on an iPad Pro, but I'll also be using these new image types for Web development and content submission. Could this be the file format of the future?

Its hard to not be a little scared when your computer tells you to update your operating system. You might worry that when they do this, they might delete any of your files, or even installed apps, and the computer might be a little slower. Should you be worried? Not really, but it is a good idea to make sure the update is done right. Always full backup your files before any updates, or at least spend a couple of hours documenting any changes that are made. Don't worry, that will become second nature as soon as you start using Photoshop. e3d0a04c9c
