Photo Story 4.0 is the follow-up to Photo Story 3.0 that was so popular it won the 2013 TIPPIE Award for Best Design Experience. Photo Story 4 includes a tremendous set of new features that are essential to the workflow of the mobile photographer to produce beautiful, travel-ready images. We've gone through the whole workflow from importing photos and selecting them for editing, to making changes in real time and saving the finished work. And with the premium upgrade to the UX version, you can create and save your projects in your own MobiService account so your work isn't just saved, it's also available to you from anywhere. The latest version of the infamous Photoshop is the studio's latest Creation Suite, which unites popular different functions into one interface. Let's have a look at what has been added. It may sound like it's a lot of new features, but some of the most significant are actually

already present in the previous versions. The biggest are shared Elements Libraries, which resemble a workspace where you can quickly work on several images. Also giving Lightroom the potential to compete more seriously with the likes of the Adobe Creative Cloud is the Preview Panel. The panel is full of essential tools like Spot Removal, Canvas, Fiber-Pen tool and so on. Selecting an object inside the panel to be selected or not is a really smart feature - we haven't seen that before. If you are creating your own image in a location where you want to publish similar images, you can select a tool like Brush, and any menu or toolbar changes you perform will be applied only to that image. Also, you can create batches of images, making specific adjustments on a set of images, but only their metadata will be copied to the next batch. I like the idea of batching images and it's time to think of ways to tap into it. The aforementioned elements panels are available with a drag-down button on the top navigation bar, allowing you to make changes not only to the small image, but to the entire workspace.

The world's best commercial print workflow has moved to the web. As part of Adobe's mission to enable people to work anywhere, publish anywhere and remain productive, the new Web exports have been released for Adobe Creative Cloud customers. Web exports leverage features in the same way that print exports do, only on the web. As web technology continues to evolve, web exports are a great way to validate your ideas for the web. It allows them to be experimented with and changes to be easily made. Web exports also work across all devices across the four major Creative Cloud applications (Adobe Photography & Design, Adobe Illustrator, Adobe Spark and Adobe XD). This makes the creative process instant and collaborative. For

users designing for the web, the new web export will enable them to collaborate and make adjustments in a view that will be instantly published, in a browser on any web-enabled device with an Internet connection. Although it's only a beta release of the Web Exports feature, users are being advised to try the feature to get a feel for it. The new website capabilities are now available, including a material library and a new simple user interface. LOS ANGELES--(BUSINESS WIRE)-- Today at Adobe MAX (booth #2035 at the show), Adobe (Nasdaq:ADBE) announced new innovations in Photoshop that make the world's most advanced image editing application even smarter, more collaborative and easier to use across surfaces. Additionally, Adobe expands its Creative Cloud suite with a new set of tools from the community, including a new Mightbox experience, where you can save/share your best work with others, and new tutorials and training from leading industry experts. "We listened to passionate artists, design professionals and educators to build a more powerful Photoshop that helps team members stay productive in and out of the app," said Shantanu Narayen, president and chief executive officer, Adobe. "As access to high-quality images and content expands in mobile and mixed reality, a smooth and intuitive workflow and high-quality tools are essential for independent designers and photographers to make the magic happen."

Hello, are you a beginner a designer? Are you planning to design a new logo or business card? Although designing the graphics is a simple task, there are many limitations that make this process difficult. Photoshop is the best for professionals to use, but for beginners and amateur designers, there are other tools available. Photoshop is an excellent application for web designers and professional graphic

designers, but for the sake of being less expensive, Adobe Photoshop is good for designers who have some experience but are just starting out. Adobe Photoshop Express is a website where a newbie designer can capture photos with help of 3D effects and portraits with the help of a camera and can learn a new technique. It is a portfolio and creative community where photographers can showcase their best works for the world to see. Photoshop Fix is a subscription based service that offers multiple retouching tools and filters. It is used to enhance any photo. There are two options, one is to pay monthly and the other is to pay for a yearly subscription. It is great for designers and photo editing enthusiasts. The best part is that, with less than a \$20 monthly fee, you can access to 3D effects, retouching tools, and a great number of other photo editing tools for Photoshop. Photoshop Elements is Adobe's alternative to Photoshop; it is completely free and offers more powerful features. The interface is easy to follow and learn. Photoshop Lightroom is the Adobe's all-in-one photo editing software. It has a rich set of features and tools that makes a picture look more natural than other tools. It is better than taking the right photo because processing and editing is also important.
